## Cybersecurity Tip of The Week- 6/11/18

### ***RECENT CELEBRITY DEATHS & POTENTIAL SCAMS***

Two celebrities committed suicide this week, and unfortunately that's going to be exploited again by internet criminals in a variety of ways, so be careful with anything related to this sad news, including emails, attachments, any social media (especially Facebook) and texts on your phone. Earlier celebrity death scams show there will be a high click rate on phishing emails and other social media that claim to show "their last words/moments on video".

Whatever ruse is being used, you will wind up with either infected computers at the house, in the office, giving out personal information or unleashing ransomware.

***Think Before You Click!***
