CD and IRA interest is compounded and credited quarterly. CD rates are fixed for the initial term with the exception of the 18 Month IRA Variable. A penalty may be imposed for early withdrawal from a CD or IRA. The NOW Checking Account interest rate is variable. Interest is compounded and added to the account monthly. The average daily method is used to calculate NOW Checking Account interest. Money Market Account interest rates are variable. Interest rates and APY (annual percentage yield) depend upon the applicable rate tier. Savings Account interest is variable. Interest is compounded and added to the account quarterly. The daily balance method is used to calculate Money Market Account and Savings Account interest. Variable interest rates may change after the account is opened. Account fees could reduce earnings on NOW Checking and Savings. Minimum balance is the minimum required to obtain the stated APY. The APY is accurate for the stated time period. A copy of the Truth-In-Savings Disclosure for a specific product is available upon request. Member FDIC
